

施政目標與重點

Administrative Goals and Key Tasks

>>國道5號坪林行控中心專用道

本會為打造人本、優質、永續的新世紀國家公共建設，積極配合國家施政建設目標，強化服務與輔導的功能，整合政府部門公共工程之資源與積極導入民間、企業之思維與活力，以提升公共工程品質與執行績效。

本會依據行政院96年度施政方針，配合中程施政計畫及核定預算額度，並針對當前社會狀況及本會未來發展需要，編定96年度施政計畫，其目標與重點如次：

壹、年度施政目標：

一、建構政府採購資訊體系，促進資訊共享：

- (一) 推動「政府採購資訊公告系統」，發行「政府採購公報」，統一招標及決標資訊，建立公開透明採購環境，便利廠商與民衆查詢政府採購相關資訊，並適時檢討修正政府採購法令。
- (二) 推動電子領投標，提供廠商全天24小時網路直接繳費並下載招標文件，節省往返機關時間及人力。

(三) 推動「共同供應契約電子採購系統」，以網路取代傳統訂購流程，減少各需求機關採購人力，降低政府採購支出，提升政府採購效率。

(四) 訂定公共工程資訊交換標準，促進資訊互通共享，減少資訊重複建置情形，提升政府行政效率。

二、落實公共工程品質躍升方案，提升工程品質：

(一) 辦理「推動公共建設方案」，提升執行績效辦理列管公共建設計畫之督導協調，並協助解決困難，以加速推動公共建設，提高預算執行績效。

(二) 推廣工程標案管理資訊系統應用，發揮管理資訊功能

透過各種管道，向各機關宣導如何應用本會工程標案管理資訊系統，使各機關均樂於透過本系統來管理工程標案，掌控品質、進度與經費支用。本會並將持續改善系統之功能性與完整性，使連線使用本系

I. Annual Administrative Goals

The PCC strives to create a human-based, high-quality, and sustainable national infrastructure for the new century by working in line with national construction goals, reinforcing its service and guidance functions, integrating the public construction resources of the government sector, and bringing in the thinking and vitality of the private and corporate sectors in order to enhance the quality and performance of public construction work.

Based on the Executive Yuan's administrative directions for 2006 and in accordance with medium-term administrative plans and approved budgets, as well as current societal conditions and the Commission's own future developmental needs, the PCC has compiled an administrative plan for 2006 that contains the following goals and key tasks:

1. Construction of a government procurement information system and promotion of information sharing

- (1) Implementation of the "Government Procurement e-Bidding System" and publishing of the "Government Procurement Gazette" to unify bidding and bid-awarding information, thereby building up an open and transparent procurement environment and helping enterprises and the public retrieve information about government procurement. In addition, review and revision of government procurement laws when necessary.
- (2) Promotion of electronic bid retrieval and provision of 24-hour direct Internet payment as well as downloading of bid documents, thereby saving time and manpower for person visits to related agencies.
- (3) Implementation of the "E-procurement System for Common Supply Contracts" to replace conventional procurement procedures, thereby reducing procurement manpower, lowering the cost of government procurement, and upgrading the efficiency of government procurement.
- (4) Setting of data exchange standards for public construction so as to promote the sharing of data, reduce redundancy in data filing, and enhance the efficiency of government administration.

2. Implementation of the public construction quality enhancement program and upgrading of construction quality

- (1) Carrying out of the "Public Construction Promotion

Program" to upgrade administrative performance

Implementation of supervision and coordination in regard to monitored public construction projects, and provision of help in solving problems so as to accelerate public construction work and heighten budget implementation performance.

- (2) Extension of the use of the construction bidding management information system so as to realize the function of management information

Use of various channels to educate government agencies in how to use the PCC construction bidding management information system so that the agencies will be happy to manage construction bidding through the system and use it to control quality, progress, and expenditures. The PCC will continue improving the functionality and comprehensiveness of the system so that the number of people using it online will increase continuously, the goal of making full use of information will be achieved, and administrative efficiency will be upgraded.

統之人員持續增加，充分發揮資訊功能之目標，提高行政效率。

(三) 加強公共工程品質教育訓練，提升品質管理能力

為擴大受訓人次，擬與各工程主管機關合辦相關品質訓練，以增加監工人員與主辦人員之工程知能，並持續委託學術單位辦理公共工程品質管理訓練班，培訓工程品質人員。另為使教學內容更貼近學員需求，將研擬新的教學滿意度問卷與統計作法，加強調查，並針對問卷結果，持續檢討，讓教學品質更趨完善，符合訓用合一之目標。

(四) 督導各查核小組加強查核所屬(轄)工程，以確保工程品質

為擴大查核面，擬加強督導中央部會、直轄市政府與縣市政府，加強辦理所屬(轄)工程之查核，以提升公共工程品質。目標為每年查核件數超過法定應查件數之一成。

(五) 擴大宣導全民督工機制

擬透過各種座談會、檢討會與宣導會等場合，宣導全民監督公共工程方案之反映管道與具體成效，使民衆樂於反映，進而提

升工程品質。

(六) 全面清查閒置公共設施，主動協助各機關活化利用或提高使用率

全面清查現有之閒置公共設施，主動協助各機關研提閒置公共設施活化措施，並列管限期改善。

三、有效提升促進民間參與公共建設計畫其質與量：

- (一) 提升主辦機關計畫執行能力。
- (二) 加強促參案件執行經驗之累積與傳承，提高促參業務推動成效。
- (三) 主動協助主辦機關評估、規劃促參案件，落實行政院推動促參政策。

四、推廣生態工程，落實永續發展：

- (一) 加強生態工程基礎技術研發，降低工程經費。
- (二) 加強人才培育、教育宣導及推廣等工作。
- (三) 補助地方政府辦理生態工程各類型示範案件，以落實生態工程之執行。
- (四) 透過已建置完成之生態工程入口網站，擴大生態工程相關資訊之流通運用。

PUBLIC

CONSTRUCTION

COMMISSION

- (3) Strengthening of training in public construction quality control and enhancement of quality management capabilities

To expand the number of trainees, the PCC will cooperate with agencies in charge of construction in carrying out quality-control training so as to increase the know-how of construction monitors and personnel in charge of construction, and will continue to commission academic institutions to offer public-construction quality-control courses so as to develop construction quality-control personnel. To bring the content of training more closely in line with the needs of trainees, new instructional satisfaction questionnaires and statistical methods will be designed and survey work strengthened. Ongoing review will be carried out with reference to the results of the questionnaires in order to improve the quality of instruction and achieve the goal of unifying training and practice.

- (4) Supervision of surveillance units in strengthening the surveillance of public works within their jurisdictions so as to assure the quality of construction

To expand the scope of surveillance, the PCC will strengthen the oversight of central government ministries and commissions as well as city and county governments in reinforcing their surveillance of construction projects within their jurisdictions so as to enhance the quality of construction. The target is to surpass the number of legally required annual surveillance cases by at least 10%.

- (5) Expanded publicity regarding the mechanism for Public Oversight of Public Construction

Seminars, symposiums, and presentations of various kinds will be used to publicize response channels and the concrete results of the Public Oversight of Public Construction program, so that the public will be pleased to respond and the quality of construction will be upgraded.

- (6) Overall checking of idle public facilities and provision of assistance in restoring them to use or heightening their utilization rate

An overall check of existing idle public facilities will be carried out and assistance will be offered to the relevant agencies in working out restoration measures. The restoration projects will be monitored in making improvements by set deadlines.

3. Enhancement of the Quality and Quantity of Cases Under the Encouragement of Private

>>羅東冬山段高架橋

Participation in Infrastructure Projects Program

- (1) Enhancement of the ability of agencies to execute projects
- (2) Strengthening of the accumulation and passing on of experience in carrying out private participation projects to enhance the performance of the private participation program
- (3) Assistance will be offered to the agencies in charge in evaluating and planning cases of private participation in infrastructure projects, so as to carry out the Executive Yuan's policy of promoting private participation.

4. Extension of Eco-engineering Construction Methods in the Interest of Sustainable Development

- (1) Strengthening of research in basic eco-engineering so as to reduce the cost of construction.
- (2) Strengthening of manpower training, education, and extension work.
- (3) Local governments will be subsidized in carrying out eco-engineering demonstration projects of various kinds in order to bring about the use of eco-engineering in construction.
- (4) Use of the established eco-engineering portal site to expand the circulation and utilization of information on eco-engineering construction methods.
